Challenges of European environmental law towards 2030

Webinar series

1

Implementing the Green Deal: how many legal challenges for environmental law? 16 March 2022, 12h00-14h00

The Green Deal adopted by the Commission in December 2019 sets out the blueprint for a transformational change. In contrast to previous EU environmental programs, the Green Deal appears to be significantly more ambitious. However, it is being implemented in a piecemeal fashion with a flurry of strategies and twelve legislative proposals. The aim of the webinar is to give an overview of the legal challenges of the ongoing reform.

Host:

Delphine Misonne, Université Saint-Louis, Belgium/Brussels

Speakers:

Nicolas de Sadeleer, Jean Monnet Chair, Université Saint-Louis, Belgium/Brussels

Alicja Sikora, Chair of European Law, Jagiellonian University, Cracow, Poland

Jerzy Jendrośka, Opole University, Poland

Debate:

2

PFAS scandals in many European countries: what can we learn?

26 April 2022, 15h00-17h00

The Netherlands, Germany and Flanders have recently been rocked by pollution scandals involving polyfluoroalkyl substances (PFAS). Just at a time when these countries/regions thought they had realised the bulk of their soil policy, emerging contaminants such as PFAS are making it clear that they have missed out on these toxic substances. Where did national/regional environmental policy and regulation go wrong? Why has European regulation not worked either? Is the circular economy threatened by the ubiquitous PFAS contamination? What is the exact role of the Treaty of Stockholm and the POPs Regulation in this respect?

Host:

Thomas Ormond, Regional administration in Frankfurt/M

Speakers:

Edward Brans, Utrecht University, the Netherlands

Christoph Krakau, Ministry of the Environment, Climate Protection and the Energy Sector Baden-Württemberg, Germany

Isabelle Larmuseau, Leuven University, Belgium/Flanders

Debate:
